

Audit Commission

Introduction to client

The Audit Commission is an independent watchdog; driving economy, efficiency and effectiveness in local public services to deliver better outcomes for everyone. They work across local governments, health, housing, community safety and fire and rescue services; which means they have a unique perspective to promote value for money considering taxpayers.

Wettons Service Solution

Due to the unstable future for the Audit Commission they had a requirement for a single provider and one that could provide flexibility and work within the constraints of the transition as directed by the central Government. Our management teams are responsible for the delivery, to their corporate estate, for the provision of facilities services to this diverse national customer on a flexible and responsive operational model using a combination of static, mobile and transient cleaners.

During the last six months we have been under considerable pressure to raise standards at locations which are being marketed as part of the repositioning programme, standards have been achieved at no additional cost by restructuring the existing teams and regional resources.

Client Quote

"We have been consistently happy with Wettons dynamic approach to our ever needs and changing requirements."

Facilities Manager
