

Mizuho International

MIZUHO

Introduction to client

Mizuho International is the London based securities and investment banking arm of Mizuho Securities UK Holdings Ltd; operating from the former Head Quarters of the Financial Times, located at the heart of the City. The 2,300 square meter building, (whilst retaining much of its external façade,) was dramatically modernised in the late 1980s to include a stunning interior, incorporating a significant amount of glass from the ground to the 5th floor. The finishes also include natural wood and polished steel so that the overall effect is one of a high quality working environment.

Wettons achievement

Wettons were awarded the cleaning contract following a competitive tender in which London's leading cleaning contractors were involved. We were able to provide a professional, value for money service whilst maintaining a quality service by implementing SMART cleaning methodology. The continued flexible approach that we provide has been celebrated through year on year retention.

Continuous Improvement

Wettons strive to continually improve on our service solutions through the introduction of new chemicals, machinery and cleaning techniques which supports Mizuho in meeting the needs of its stakeholder.

Client quote

"In recent years we have been under extreme pressure to reduce costs, this usually means a 'fight' with suppliers but I was surprised by Wettons refreshing approach with this, they were very proactive about looking at ways to help us and this made the whole process simpler and less painful.

Over the years I have contracted to Wettons I have found them to be:

*Positive towards change
Excellent senior management response/availability
Good ability to find quality staff
Retention of staff less than competitors
Administratively efficient"*
Facilities Director
